RECLAIMED CONFIDENCE

Erectile dysfunction (ED) is a condition that can affect any man at some point in his life.

It is not exclusive to older men; recent studies show that 26% of men under 40 experience ED.

This condition can arise at any age, due to factors such as stress, health issues, lifestyle choices, or emotional concerns.

While it may feel overwhelming or embarrassing, it's important to recognize that ED is common and does not define a man's masculinity or overall health.

Purasomes IRC100+ offers a two-step solution, combining professional in-office treatment with an at-home touch-up aftercare, leading to better health, enhanced relationships, and a renewed sense of vitality.

IMPROVED WELL BEING

IN-OFFICE TREATMENT

Purasomes IRC 100+ solution is empowered by 20 purified most potent functional Growth Factors, derived from organic bovine colostrum, that:

- Encourage growth of new blood vessels, boosting the blood flow Support tissue healing and regeneration
- Enhances skin's thickness and firmness by promoting collagen synthesis
- Improves elasticity and enhances skin's natural barrier function

When applied topically, Purasomes IRC100+ works at the cellular level to improve overall penile health and promote new blood vessels growing, filling in erectile chambers and ensuring sufficient blood flow, essential for a healthy and sustainable erection.

This results in improved sexual function, stronger, and healthier organ overall.

Gel**

POWERFUL PURE SAFE INGREDIENTS

AMPLEX+ TECHNOLOGY

PURASOMES IRC 100+ Solution
Professional Treatment

Contains 20 most potent growth factors derived from organic bovine colostrum.

- Growth Factors (GF) are nanosized proteins influencing the behavior of cells
- Their tiny size allows them to interact effectively with cell receptors, triggering a cascade of signals that promote tissue repair and growth of new blood vessels - ability utilized in therapies like Platelet Rich Plasma (PRP)

PURASOMES BIOREGENERATIVE GEL
Home Aftercare

Formulation contains:

- Exerkines - Epidermal Workout Factors, mimicking muscular response to exercise and improving muscle function
- Natural warming agents with low irritation profile, stimulating key neurotransmitters, improving microcirculation and triggering sexual drive
